

**THE NATIONAL SURVEY OF SEXUAL ATTITUDES
AND LIFESTYLES (Natsal)**

NATSAL – WEB COMPARISON QUESTIONNAIRE

COMPUTER QUESTION LISTINGS

Note to users: this is an annotated version of the Natsal web questionnaire, showing the information screens, questions, response options and questionnaire routing. The variable names are shown for each question. On the dataset, these have a “w” prefix.

Individual questions are annotated in boxed text to indicate the following:

- **differences in variable names between the web questionnaire and Natsal-3**
- **differences in variable definitions between the web questionnaire and Natsal-3**
- **variables that have been withheld from the archived data set for reasons of confidentiality.**

In some cases, categories (e.g. ages) have been merged for reasons of confidentiality.

Respondents were not necessarily asked every question. For example, anyone who reported that they did not drink alcohol nowadays (Drink=no) would not have been asked the following questions DrinkOft, ManyAlc2 and DrinkNum, which asked about the frequency and quantity of alcohol drunk. Where responses are missing because they were not applicable in this way, they have been coded -1.

In Natsal-3, other missing values are shown as follows:

8, 98, 998 etc	Don't know (where this was not an explicit response option)
9, 99, 999 etc	Not answered.

In the web questionnaire, the equivalent missing values are as follows:

-8	Don't know (where this was not an explicit response option)
-9	Not answered.

Natsal-3 also includes some summary categories for numeric (count) variables.

INTRODUCTION

Info1

Natsal 2012 is a national study of health and relationships that takes place every 10 years across Britain. It is funded by the Medical Research Council and the Wellcome Trust. We are asking you to take part in this important study online to help improve health education, family planning, and other health services that we may all need throughout our lives.

Your answers will be kept strictly confidential and no-one looking at the study findings will be able to identify you in any way.

This web study is being carried out by NatCen, University College London Medical School (UCL) and the London School of Hygiene and Tropical Medicine (LSHTM).

How will the study take place?

Please read the questions and to enter the answers online. The study asks some questions about relationships and experiences, and you can take part no matter what your background or experience is. You can skip any questions you do not want to answer in the questionnaire. You are also free to stop answering the questions at any time.

The questionnaire can take around 20 minutes to complete, but it may take less or more time for some people. Although it is best to fill in the questionnaire at one sitting, you also have the option to save your answers partway and return to the questionnaire at a later time.

You have already taken part in phase 1 of the study and we are now asking you to complete phase 2 by taking part in this study online.

More Information button

More information screen

Is the study confidential?

Yes. We take great care to protect the confidentiality of the information we are given. The study results will not be presented in a form which can reveal your identity.

Do I get anything from the study?

We will send you a £5 high street gift voucher as a token of our appreciation for taking part once you have completed the questionnaire. This may take up to four weeks to arrive.

Will I be asked the same questions as before?

In order to examine how people's behaviour and attitudes may change over time, and to evaluate how well an online version of Natsal may work, several of the questions are similar to those you may have already answered.

Who has reviewed the study?

The study has been reviewed by an independent group of people called a Research Ethics Committee based in Oxford, who assess studies like this to ensure the rights, safety, wellbeing and dignity of those who take part are protected.

What If I have any other questions?

We hope this information page answers the questions you may have, and that it shows the importance of the study. If you have any other questions or concerns about the study, please visit our main website at: www.natsal.org or call us on freephone 0800 783 5890.

Thank you very much for your help with this study.

Intro1

Some of these questions are quite personal, so you may prefer to complete the questionnaire somewhere private. If you come to any question that you do not want to answer, just press 'next page' and it will take you to the next question.

You might find it helpful to do the questionnaire in 'full screen view' so you can see all the answer options fully. To do this press 'F11'. You can press F11 again to switch back to normal screen view (this option works with most web browsers).
